Join us today.

We build and share knowledge on the role of hydropower in renewable energy systems, responsible freshwater management and climate change solutions.

Our vision is a world where water and energy services are delivered to all in a sustainable way.

Who we are

The International Hydropower Association (IHA) is a non-profit organisation formed in 1995.

We work with a network of members and partners active in more than 100 countries.

Since our creation, we have supported the sector on a remarkable journey, as the world’s installed hydropower capacity has grown from 625 GW to over 1,200 GW – catalysing economic development and improving people’s lives around the world.

Who can join?

Membership is open to all organisations with an interest in sustainable hydropower.

Our vibrant community includes decision-makers and specialists working for hydropower owners, developers, consultancies, contractors, equipment manufacturers, governments, regulators, financial institutions, research establishments, universities, non-government organisations and industry associations.

Membership levels

Platinum
Large organisations active in the global market place, responsible for more than 10,000 MW of installed capacity.

Gold
Medium-sized organisations active in regional markets, responsible for more than 2,000 MW of installed capacity.

Silver
New or established small and local organisations with hydropower in their portfolio.
